

NATIONAL ENGINEERING SERVICE CORPORATION

◆ IT/SOFTWARE DIVISION ◆

National Engineering Service Corporation (NESC) is an industry leading provider of skilled IT/software professionals on a project and full-time basis. NESC's core business is the placement of contract/temporary, contract-to-direct, and direct placement of IT and software engineering professionals on a contingent-fee basis. NESC was founded on the essential principal of providing quality service to our clients. Our dedicated team of placement professionals work tirelessly to locate, identify, and recruit the best available talent in IT and software engineering.

EXPERIENCE MATTERS

With over 25 years of staffing experience in IT, H/S, software engineering, programming & development; NESC can provide highly skilled individuals to support virtually any IT and software engineering project. NESC's strong presence in the industry ensures we are able to represent the top professional talent locally, regional, and nationally to support your ever-changing IT/Software needs.

Our account representatives work closely with hiring managers to:

- ❖ Provide resumes of pre-qualified candidates
- ❖ Arrange suitable interview times
- ❖ Negotiate contract terms and conditions

NESC guarantees that every candidate is pre-qualified with available start time, interview times, travel requirements, and direct labor rates. Our extensive database enables us to submit qualified candidates immediately or generally within 48 hours of confirmation. NESC offers a variety of background checks; including criminal, social security tracking, compliance screening, education verification, employment verification, professional licenses and certifications. Our offices handle all billing and payroll functions with the ability to customize all reports to accommodate each client's individual needs.

By operating on a unified, nationwide database, we provide our clients with the personnel they require to meet project deadlines. Whether you are a large international corporation or a small regional business, NESC's IT/Software Division is equipped to handle your specific needs.
